

SHEIKH MOHAMMAD AHMED

Frontend Web Developer | HTML, CSS, JavaScript, Firebase

PROFESSIONAL SUMMARY

Frontend Web Developer specializing in HTML, CSS, and JavaScript (ES6) to build responsive, user-centric web applications. Proficient in leveraging Firebase for backend services, including user authentication and database integration. Skilled in version control with Git and GitHub, UI/UX design principles, and writing clean, maintainable code. Actively expanding backend expertise with Supabase and seeking an internship to apply problem-solving and debugging skills within a collaborative team environment.

EXPERIENCE

Self-employed

Oct 2024 — Present

Freelance

Karachi, Pakistan

- Built responsive, full-stack web applications for multiple clients using HTML, CSS, JavaScript, and Bootstrap for the front-end, integrated with Firebase and Supabase for database management and user authentication.

JEB Schools & Colleges

Oct 2024 — Present

Computer Teacher & Web Designer (Volunteer Staff)

Karachi, Pakistan

- Designed and developed responsive websites, UI layouts, and digital academic materials for staff using HTML, CSS, JavaScript, and Bootstrap, while simultaneously teaching computer fundamentals to over 50 students.

Database Integration

PROJECTS

SMIT Grand Coding Night 2026 Winning Project

HTML • CSS • AI-assisted development

Developed the winning project for the SMIT Grand Coding Night 2026, a 12-hour competition, by building a responsive frontend application using HTML, CSS, and Bootstrap, leveraging AI tools to accelerate debugging and layout implementation.

Markaaf Studio Website

HTML • CSS • FIREBASE • JS • TAILWIND CSS • AI

Built a responsive portfolio website for Markaaf Studio, creating a primary marketing channel to showcase its web development, UI/UX, and branding services. Implemented the frontend using HTML, JavaScript, and Tailwind CSS, and integrated Firebase as hosting service and form handling.
